

## Safer working - is there another way?

Do you want to lead on health and safety performance and improve your chances of winning and retaining contracts?

### Is developing an open and safer working culture your next step to

- ✓ Improving your AIR and AFR rates?
- ✓ Building on the success you've already had with competency and compliance training and safety process design?
- ✓ Developing relationships with clients, communities and subcontractors?
- ✓ Meeting Corporate Manslaughter legislative requirements?
- ✓ Demonstrating fresh thinking on CSR, worker engagement and the Respect For People agenda in your contract bids?

### NGL Work Safe programme

New Generation Learning's unique approach to on-the-job training has been proven to get real behavioural change from front line people and to create a positive peer pressure for safer working practices.

The programme's aim is simple - to have operatives and supervisors regularly discuss safety in a mature way rather than seeing it as something to avoid. Its 'drip, drip, drip' approach steadily beds the desired safety culture into your workforce.

The practical and flexible programme:

- ✓ Creates a safety campaign of 20 minute Work Safe Discussion toolbox talks
- ✓ Develops supervisors to coach and cascade training to their teams
- ✓ Caters for individual learning styles and abilities with highly visual exercise activities and group discussion
- ✓ Carries your key messages for safety standards with follow ups to check on progress
- ✓ Is simple to administer within normal working
